# Better, faster, and more sustainable.

## Aphidoletes-System - New packaging

biobest
DIVISION OF BIOFIRST GROUP

| Feature | Why it matters |
|---|---|
| Easy-to-open system with integrated hanging hook | Simple, quick and user-friendly installation. Ensures correct placement in the crop for optimal emergence and dispersal. |
| Built-in sugar strip | Provides a direct energy source for newly emerged adults. Supports longer lifespan, better flight capacity and higher egg production, ensuring faster establishment and improved aphid control. The sugar source can also benefit other beneficials present in the crop. |
| Optimal environment for hatching & mating inside the packaging | Creates the right conditions inside the packaging for both hatching and mating, supporting second-generation establishment and stronger population build-up. |
| Fully recyclable packaging | Reduces plastic use and supports sustainable growing practices without compromising product performance. |
