

CONTACT INSECTICIDE, MITICIDE AND FUNGICIDE

APPEAL® is a contact pesticide for the control or suppression of listed insects, mites and diseases on specified crops. Since it has only contact and no residual effect, APPEAL can be used in an integrated pest management program to inhibit the development of resistance to residual pesticides.

FEATURES & BENEFITS

- Active ingredient: Cold-pressed orange oil 6%
- Versatile PMRA-registered pesticide
- Functions as a 3-in-1 contact, non-residual fungicide, insecticide, and miticide
- Proprietary OROWET® technology ensures uniform application

MODE OF ACTION

- Contact, non-residual mode of action.
- Breaks down waxy layers of insect and mite exoskeletons, causing desiccation.
- Breaks down protective layers of exposed fungal mycelium and spores, causing rapid desiccation.
- Broad-spectrum control against a wide range of insects, mites and diseases.
- Best efficacy when directed at the soft-bodied insects and fungal structures that allows direct contact.

ADDED VALUE

- Excellent tank mix partner
- Alternate mode of action in a resistance management program
- Low impact on beneficial insects
- No residues, allowing use up to harvest

AVAILABLE IN

10
litre bottle

1000
litre tote
