

Beneficial Insectary

PROVIDING A NATURAL BALANCE IN PEST MANAGEMENT

August 12th 2026

Letter of Assurance

Beneficial insectary assures that the beneficial insects and mites are in compliance with the Good manufacturing Practices.

This letter of assurance guarantees that these products along with the carriers and packaging are controlled and meet the following conditions:

- Beneficial Insectary holds valid import permits for all biological control organisms and other products.
- Beneficial Insectary's biocontrol agents are not invasive species to Canada as per regulations.
- The quality of Beneficial Insectary products are verified using a quality control system.
- Products do not use genetically modified organisms.
- Products do not contain any preservatives, hazardous plant diseases and insects.
- All products are stored, transported and delivered under conditions to minimize any contamination.
