

## Creeping Bentgrass

### Description

777 (Triple Seven) Creeping Bentgrass is the product of twenty years of research and development by Dr. Richard Hurley, Dr. Leah Brillman of DLF and Dr. Stacy Bonos of Rutgers University. Each parental line in 777 started with selection of superior plants from golf courses and then crossing, followed by many years of trials before inclusion in this variety. This variety has shown superior performance under stress and with wear. 777 produces a turf with attractive green color, no purpling in cool weather, great heat resistance in summer and high disease resistance. 777 creeping bentgrass blends well with other leading bentgrass varieties. This variety is well adapted to all environments where creeping bentgrass can be grown. It can be planted straight or in blends for superior greens and tees.

### Key Features

- Fine leaf texture with attractive dark green color
- Higher turf density for better putting quality and Poa annua resistance
- Improved resistance to Dollar Spot Brown Patch and Snow Mold
- Great performance for all greens mowing heights
- Excellent for green, tees and fairways

### Ratings

Scale 1-9, where 9 = best or most pronounced

Alliance for Low Input Sustainable Turf® (A-LIST®), a non-profit that evaluates and promotes turfgrass varieties needing less water, pesticides, and fertilizers. Through rigorous testing, A-LIST® ensures our approved grasses excel in performance and sustainability.

Super Bents™ are advanced creeping bentgrass varieties developed for over 40 years, featuring fine leaf texture, high density, and exceptional disease resistance. Ideal for golf courses, they require fewer inputs, recover quickly, and are recognized for environmental sustainability.

## Creeping Bentgrass

Species	Creeping Bentgrass	Sci. Name	Agrostis stolonifera
Approx. Seeds/Kg.	13200000	Approx. Seeds/Lb.	6000000
Seeding Depth (cm)	0.3175-0.635	Seeding Depth (Inches)	1/8-1/4
Seeding Rate - Alone/New (Kg./Hectare)	50-75	Seeding Rate - Alone/New (Lbs./Acre)	45-65
Seeding Rate - Golf Green Interseed (Lbs./1000 sq. ft.)	2-3	Seeding Rate - Golf Green Overseed (Lbs./1000 sq. ft.)	2-3
Seeding Rate - Interseed (Kg./100 sq. meters)	1-1.5	Seeding Rate - Interseed (Lbs./1000 sq. ft.)	2-3
Seeding Rate - New (Kg./100 sq. meters)	0.5-0.7	Seeding Rate - New (Lbs./1000 sq. ft.)	1-1.5
Seeding Rate - Overseed (Kg./100 sq. meters)	1-1.5	Seeding Rate - Overseed (Lbs./1000 sq. ft.)	2-3
Endophyte + (Yes, No)	No	Establishment (Days)	7-14
First Mowing (Days)	21	Germination (Days)	3-5
Nitrogen Requirement (Low, Med, High)	Low
