

The leading product in sustainable yield performance & crop health

INTRA ECO SHIELD: CREATES A VITAL DEFENCE!

Intra Eco Shield promotes the growth of robust and healthy crops, enhancing their defense against abiotic stress while improving nutrient absorption. This product is deposited in the outer cell walls of plants, creating a natural barrier that protects against mechanical damage. Intra Eco Shield can be administered through the irrigation system or used as a foliar spray. By applying it weekly, you can reduce production losses and increase your yield.

6 REASONS TO CHOOSE FOR INTRA ECO SHIELD

- ✓ Greater resistance to harmful abiotic stress exposure
- ✓ Improves production results
- ✓ Provides a natural shield in plant cells
- ✓ Prevents production losses
- ✓ Easy-to-use with excellent absorption
- ✓ Unique blend with the highest level of plant-available silicon

ECO SHIELD creates a more vital plant by strengthening the natural defence of plants' cell walls

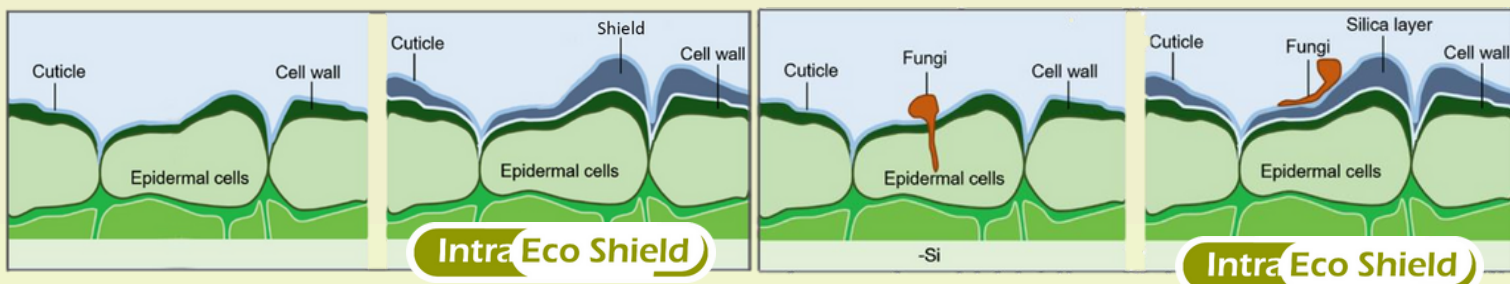

PROTECT YOUR PRODUCTION with stronger, healthier plants for increased yield

Formulated for **EXCELLENT ABSORPTION** and **EASY DOSAGE** through fertilization systems

IMPROVED RESISTANCE WITH A NATURAL SHIELD, PESTICIDE FREE

ECO SHIELD AND TOMATO CROPS

- ✓ Boosts calcium uptake, reducing the risk of blossom end rot in tomatoes
- ✓ Helps maintain high yields even under stress conditions
- ✓ Enhances nutrient absorption for healthier, more productive plants

ECO SHIELD AND CUCUMBER CROPS

- ✓ Enhances cucumber plants' resilience to abiotic stresses
- ✓ Promotes plant health
- ✓ Reduced susceptibility to disease
- ✓ Strengthens plant walls, improving plant structure and durability

ECO SHIELD AND PEPPER CROPS

- ✓ Boosts calcium uptake, reducing the risk of blossom end rot in peppers
- ✓ Helps maintain high yields even under stress conditions
- ✓ Enhances nutrient absorption for healthier, more productive plants

Intra Eco Shield **strengthens and improves crop health for optimal yield**—start strong for future proof growing.
