

DUnavin

Cucumber Long

Quality Meets Speed

DUnavin is a strong generative, early, and fast-to-produce variety, ideal for short-crop production while achieving high yields. DUnavin has a well-balanced plant type which translates into good production speed, vigor, and strength. These attributes make it a versatile variety suitable for both Low Wire (LW) and High Wire (HW) systems. It performs the best during the Spring, Summer, and Early Fall plantings.
