RE: Disclaimer on Genetically Modified Organisms

To Whom It May Concern:

The seeds of varieties which are supplied to Buyer are varieties which are not developed by using the technologies of genetic modification ("GM"). The methods used in the development and identity preservation of these varieties are aimed at avoiding the presence of off-types, which includes avoiding the presence of GM material.

Seed production has been carried out in accordance with the production rules in the country where production took place, including any stipulated isolation distances. Nunhems is committed to the proper stewardship of its products, supports and has affirmed its commitment to the Excellence Through Stewardship™ industry stewardship initiative to be found at the following website: www.excellencethroughstewardship.org. However, due to free circulation of pollen and because it cannot be excluded that GM material is cultivated by others in seed production areas, admixtures with GM material cannot totally be prevented. Therefore, no guarantee could be given that the seed lots comprising this delivery are free from any traces of GM material.
