

PHEROCON® PEW™ DUAL Lures

Assembly Instructions for use with PHEROCON® PEW™ Trap

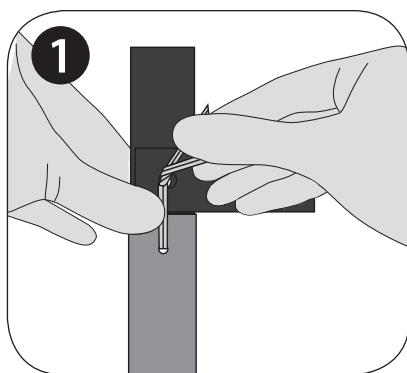

For: Pepper Weevil, *Anthonomus eugenii*

Materials Needed:

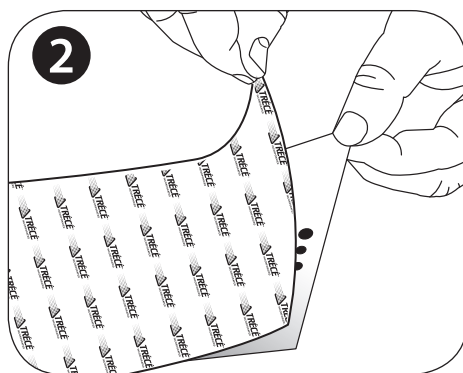

- A. PHEROCON® PEW Trap
- B. PEW I Lure and PEW II Lure
- C. Twist ties
- D. Flat wooden stake with hole near the end (not included)
- E. Stapler (not included)

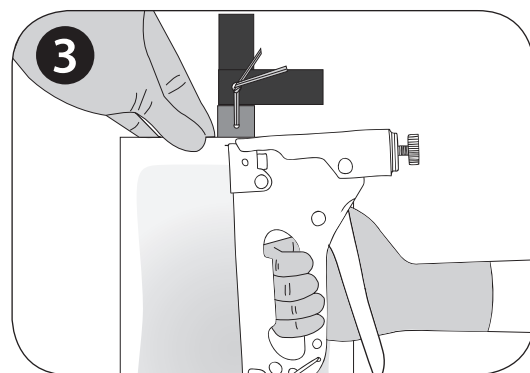

NOTE: PEW I Lure has a triangle punch and PEW II Lure has a round punch.

1. Insert the first twist tie through the holes in both PEW I Lure and PEW II Lure, then through the hole in the top of the stake, and twist to secure.

2. Remove release liner from both sides of the PEW Trap.

3. Staple top and bottom sections of PEW Trap to the stake.

NOTE: In order to prevent reduction in pheromone release rate, do not press the lures onto the adhesive.

4. PEW I Lure, PEW II Lure and PEW Dual Panel Adhesive Trap are installed.

PHEROCON® PEW Trap – for Pepper Weevil – instructions for use:

PLACEMENT TIME:	Usually 2 weeks before bud. Trap effectiveness will probably decrease with maturation of pepper plants and with changes in pepper weevil population dynamics, due to competition from native males and increased numbers of already mated females. Traps may capture a large proportion of the population at the end of the season when fields are cultivated or after a hard freeze.
TRAP PLACEMENT:	Position traps just above the canopy of the plant. The bottom of the trap should be at the top of the plant. Set up traps in a perimeter pattern and within the field for accurate monitoring. As plants mature use a grid pattern to capture second and later generations as they emerge.
TRAP DENSITY:	Minimum of 2 traps 2.5 acres/1 hectare, in addition to the leeward or alternate host sides of the field. In areas with a history or presence of heavy infestation pressure, use 1 trap per acre.

PHEROCON® PEW DUAL Lures – for Pepper Weevil – instructions for use:

PHEROCON® PEW DUAL Lures are for use with PHEROCON® PEW Trap in monitoring PepperWeevil (<i>Anthonomus eugenii</i>) population to better time control spray applications.	
DESCRIPTIONS:	The PHEROCON® PEW DUAL Lures are a special formulation.
LURE AND TRAP MAINTENANCE:	Replace PEW DUAL Lure system every 3-4 weeks. Be sure to use both PEW I and PEW II lures, please note that PEW I Lure has a triangle punch and PEW II Lure has a round punch. Replace PEW Trap every 2 weeks, or sooner if heavy dirt or dust build-up on glue surfaces reduces catching efficiency. Transfer lures to replacement trap if new trap is needed before the suggested lure termination date.
ORDER INFORMATION:	The PHEROCON® PEW Trap and PEW DUAL Lures can be ordered from your Agriculture Chemical Distributor or dealer.

PHEROCON® is a registered trademark of Trece Incorporated, Adair, OK USA

USE ONLY ONE SET OF PHEROCON PEW DUAL LURES PER TRAP.
ALWAYS WEAR GLOVES WHEN INSTALLING LURES; WASH HANDS AFTER USE.
