Information provided is based on experience with tests, trials, or practices as well as general observations over multiple years.

Individual results may vary. Nunhems USA, Inc. ("Nunhems") strives to provide accurate and complete information, descriptions, content, illustrations, images, and data ("Information") on its websites, social media sites/posts, and printed materials ("Publications") as such Information is reasonably available to Nunhems at time of compilation. When the Information is based on experiences with tests, trials, or practices, such Information is provided by Nunhems as closely as commercially possible to such experiences. Information may also be based on general observations. However, Nunhems cannot guarantee the Information in any form whatsoever; therefore, the Information is provided on an 'AS IS' basis and without any guarantee, either express or implied, including, without limitation, that the Information is accurate or complete. Under no circumstances is the Information to be considered as advice or as a recommendation. Buyer is solely responsible for seed selection and purchasing decisions, including whether to rely upon the Information and for determining suitability of the seed for the intended growth and use under buyer's local conditions.

The Publications are intended to help buyer identify plant diseases that may or could affect his/her crops. The images may give a distorted image of reality and may otherwise not be an accurate portrayal of the disease.

### The Efficient Choice

Success is never a coincidence. It is the result of using your resources in an efficient and responsible way and thus creating continuous profitability potential. SEpire is the ultimate variety that helps to ensure long-term benefits.

High percentage of large and medium-sized cucumbers

Large and medium-sized cucumbers give the best prices in the US market. With SEpire, there's higher potential for these grades from spring to fall.\* The result in an up to 6% higher income per hectare compared to the standard variety.

Based on observations of field trials conducted by or on behalf of Nunhems USA, Inc and/or Nunhems Netherlands B.V.

Strong and healthy

SEpire is a strong, open and vigorous variety. This variety was developed for use in extreme summer conditions and is highly resistant to CGMMV, CMV, CYYV, and Px.
