MEMO : Virkon™ GREENHOUSE : Disinfectant: Virucide, Bactericide and Fungicide
PEST CONTROL PRODUCTS ACT: NO. 24210

This memo confirms and clarifies the approved label for Virkon™ GREENHOUSE, a disinfectant manufactured by Lanxess and registered in Canada by Vetoquinol N.-A. Inc. (PCP # 24210).

Virkon GREENHOUSE is a broad spectrum germicide for disinfection of hard surfaces and equipment in greenhouses and also vegetable and fruit storage areas. It contains Potassium peroxymonosulfate present as Potassium peroxymonosulfate sulfate 21.4%.

To optimize disinfection, surfaces and equipment should be cleaned with an appropriate cleaner or detergent in order to remove as much organic material as possible prior to disinfection.

For growers and producers using Virkon GREENHOUSE for disinfection of hard surfaces and equipment in greenhouses, Virkon GREENHOUSE can be used in their regular disinfecting program in any type of greenhouse as long as there are no plants present in the greenhouse. Do not apply Virkon GREENHOUSE directly to plants, seeds or soil.

Refer to <http://biosecurity.vetoquinol.com> for proper applications. Virkon GREENHOUSE used according to label does not leave any residue. It is the responsibility of the growers and producers to ensure that anything used to disinfect the greenhouses will not leave residues on the plants, seeds, soil, vegetables or fruits. The growers and producers must take measures to prevent cross-contamination. Please refer to the label for full directions for use, first aid instructions, precautions, environmental hazards, and disposal.

This memo applies only for the above-mentioned product. Please contact us should you need additional information on other Vetoquinol products.

Sincerely yours,

Edith Lépine, B.Pharm., PMP
