

WINDSOR PROFESSIONAL WATER SOFTENER CRYSTALS

SOURCE:

Windsor Professional Water Softener Crystals are a high purity white crystalline salt product produced by the natural evaporation of salt brine. The salt crystals are cubic, white solid, transparent or translucent when in large crystals.

DESCRIPTION:

- Ultra-high purity Solar Salt - 99.7%
- Dried to + 400 degrees and cooled
- Consistent sizing and gradation
- Dust free
- NO additives

USES:

Windsor Professional Water Softener Crystals are used to make high purity brine for the regeneration of water softening resin. Solar salt resists bridging and mushing.

AVAILABILITY:

This product is available in 20kg bags.

TYPICAL CHEMICAL ANALYSIS:

Sodium Chloride	99.74%
Calcium & Magnesium	< 0.07%
